

International Food and Agribusiness Management Review

A publication dedicated to timely research and discussions on the global food system

The International Food and Agribusiness Management Review (IFAMR) is internationally recognized as a catalyst for discussion and inquiry for those interested in the food and agribusiness system. According to the latest Journal Citation Report of Clarivate, IFAMR enjoyed an IF increase of 26% over the last year and now ranks in Q2 by Journal Citation Indicator (JCI) and Q3 by Journal Impact Factor (JIF) in the agricultural economics and policy category.

IFAMR publishes high quality, peer-reviewed, scholarly articles on topics related to the practice of management in the food and agribusiness industry. It provides industry executives, managers, scholars and practitioners an intellectual forum where they can publish and acquire research results, new ideas, applications of new knowledge, and discussions of issues important to the worldwide food and agribusiness system. The journal welcomes scholarly articles on business, public policy,

law and education pertaining to the worldwide agribusiness and food system. Articles may be applied or theoretical, but must be relevant to managers or management scholars.

The core values of the Review are as follows: excellent academic contributions; fast, thorough, and detailed peer reviews; building human capital through the development of good writing skills in scholars and students; broad international representation among authors, editors, and reviewers; a showcase for IFAMR's unique industry-scholar relationship, and a facilitator of international debate, networking, and research in agribusiness.

For more information about the IFAMR and the International Food and Agribusiness Management Association, please visit our website. Please feel free to contact us if you have any questions and/or would like cooperation.
